

Anil Kumar Patnala

SKILLS

Cloud / Backend

Azure · AWS · GCP · Azure DevOps · Terraform · Docker · Kubernetes · Helm · K3s · Nginx · Istio · Node.js · Express.js · Fastify · TypeScript · JavaScript · Redis · MS Graph API · REST APIs · GraphQL · PostgreSQL · MongoDB · Prisma · Flyway · BullMQ · HAPI FHIR · ODK (Data Collection)

DevOps / DevSecOps & CI/CD

Jenkins · Concourse · Azure Pipelines · SonarQube · Snyk · Wiz · Trivy · Argo CD · Veracode · Burp Suite · HCL AppScan · Kiali · Prometheus · Grafana · OpenTelemetry

Identity & Security

Azure Entra ID · Auth0 · OKTA · Keycloak · JWT · OAuth 2.0 · SSO

Frontend / Web

AR / VR / MR · ArCore · React.js · Three.js · 8thWall · A-Frame · JSArToolKit · Next.js · AngularJS · WebXR · MUI · Tailwind · TanStack · Material React Table · Table Virtualization · Babylon.js

AI / GenAI (Basics Level)

OpenAI · Azure AI Foundry · OCR · AI Search · LLMs · RAG

LANGUAGES

English	Native
Telugu	Native
Hindi	Native
Kannada	Beginner

EDUCATION

B.Tech / B.E. I Computer Science and Engineering (CSE)

VITAM (Affiliated: Jawaharlal Nehru Technological University, Kakinada)
2015

KEY ACHIEVEMENTS

Microsoft Certified: Azure Fundamentals (AZ-900)

Innovation Award (2024–2025)

Excellence in Performance Award (2021–2022)

Lead Software Engineer | Cloud & Full-Stack Developer

SUMMARY

Cloud and Backend Lead Engineer with 9+ years designing and delivering scalable cloud-native and hybrid solutions on AWS, Azure, and GCP. Experienced with on-premises VMs and Kubernetes (K3s) for sensitive and regulated workloads. Strong in microservices, Node.js, PostgreSQL, and secure auth (OKTA, Auth0, Keycloak with RBAC). Hands-on with Docker, Kubernetes/K3s, CI/CD (Jenkins, Argo CD, Azure DevOps), and IaC (Terraform). Frontend experience with AngularJS and React, plus AR/VR/MR web technologies, with a focus on high availability, solution architecture, and technical leadership.

EXPERIENCE

Team Lead

SLK Software (Part Of Altimetrik)

06/2025 – Present

- Lead end-to-end solution design, estimation, and delivery; mentor engineers across backend and cloud.
- Optimize deployment pipelines and platform performance; reduced deployment time by approximately 20 minutes by optimizing Docker container images.
- Cut deployment-related code by approximately 50% using shared libraries and reusable modules for CI/CD and release workflows.
- Set up CI/CD and Infrastructure as Code for secure cloud deployments (Azure DevOps Pipelines, self-hosted agents, Azure Blob Storage for artifacts).
- Built AI-powered search infrastructure and optimized Azure Blob Storage for faster retrieval and lower latency; created an evaluation pipeline to automate data ingestion and reduce manual work by approximately 30%.
- Hardened Azure networking and security with private endpoints, DNS zones, and firewalls; set up monitoring, logging, and debugging with Azure Functions and related Azure services.
- Projects:** AskBall · Quote AI NAM.
- Clients:** Emerson NAM · Ball Corp.

Software Developer Lead

SLK Software / Digital (Part Of Amin Holdings)

04/2024 – 05/2025

- Lead and mentor engineers across backend, cloud, and frontend; set technical direction and reduce delivery risk via code reviews.
- Own end-to-end delivery across full SDLC — scope, estimation, architecture, build, test, and deployment.
- Improved scalability and reliability through architecture refinements and database migrations, cutting latency by ~20%.
- Built production platforms with Node.js, PostgreSQL, Docker, Kubernetes, GCP, and Azure.
- Integrated secure authentication with Auth0 and OKTA in Agile delivery.
- Projects:** Dextr · Quote AI MEA · Insure AI · FRP · MM-ERP · TAT · Mithril · POCs & demos.
- Clients:** Emerson MEA · Berry Global · Maldivian Mermaid.

Senior Developer

V-Labs Pvt Ltd (Part Of SLK Software)

07/2021 – 04/2024

- Delivered backend and cloud platforms for mission-critical systems with stronger reliability and scalability.
- Built Node.js/Express microservices and REST APIs with PostgreSQL for AI-driven data processing.
- Created reusable components that cut development effort by ~80% and improved critical module performance by ~68%.
- Integrated secure authentication with OKTA (SSO), Auth0, Azure AD, and JWT.
- Architected scalable GCP infrastructure (GKE, Pub/Sub) and end-to-end CI/CD with Concourse, Docker, and Kubernetes.
- Enforced quality and security gates with Veracode, SonarQube, and Stackdriver.
- Projects:** NBSI · Endorsement · POCs & demos.
- Clients:** CNA · Finolex.

Software Developer

Immersion Software Labs Pvt Ltd

02/2017 – 08/2021

- Owned end-to-end web delivery for AR/WebAR, VR/MR products and admin dashboards (UI/UX) across L Catalog, ALS, WebAR apps, and POCs/demos.
- Built interactive AR experiences with A-Frame, Three.js, JSArToolKit, WebXR, and Babylon.js; optimized 3D rendering, interactivity, and mobile performance.
- Delivered AngularJS Progressive Web Apps with Google Analytics for engagement tracking and frontend flows for catalog browsing and AR campaigns.
- Built Node.js APIs with MongoDB (caching/proxy patterns) and deployed on AWS (EC2, S3, Auto Scaling, Security Groups, ELB, VPC).
- Projects:** L Catalog · ALS · WebAR apps · POCs & demos.
- Clients:** ALS · Cliff.
