SUMMARY

Cloud and Backend Lead Engineer with 9+ years designing and delivering scalable cloud-native and hybrid solutions on AWS, Azure, and GCP. Experienced with on-premises VMs and Kubernetes (K3s) for regulated workloads. Strong in microservices, Node.js, PostgreSQL, and secure auth (OKTA, Auth0, Keycloak with RBAC). Hands-on with Docker, Kubernetes/K3s, CI/CD (Jenkins, Argo CD, Azure DevOps), and IaC (Terraform). Frontend experience with React and AngularJS, plus AR/VR/MR web technologies, with a focus on high availability, solution architecture, and technical leadership.

SKILLS

Cloud / Backend: Azure, AWS, GCP, Azure DevOps, Terraform, Docker, Kubernetes, Helm, K3s, Nginx, Istio, Node.js, Express.js, Fastify, TypeScript, JavaScript, Redis, MS Graph API, REST APIs, GraphQL, PostgreSQL, MongoDB, Prisma, Flyway, Kafka, BullMQ, HAPI FHIR, ODK (Data Collection)
DevOps / DevSecOps & CI/CD: Jenkins, Concourse, Azure Pipelines, SonarQube, Snyk, Wiz, Trivy, Argo CD, Veracode, Burp Suite, HCL AppScan, Kiali, Observability - Prometheus, Grafana, OpenTelemetry
Identity & Security: Azure Entra ID, Auth0, OKTA, Keycloak, JWT, OAuth 2.0, SSO
Frontend / Web: AR / VR / MR, ArCore, React.js, Three.js, 8thWall, A-Frame, JSArToolkit, Next.js, AngularJS, WebXR, MUI, Tailwind, Tanstack, Material React Table, Table Virtualization, Babylon.js
AI / GenAI (Basics Level): OpenAI, Azure AI Foundry, OCR, AI Search, LLMs, RAG

EXPERIENCE

Team Lead Software - SLK Software (Part of Altimetrik)

06/2025 – Present

- Lead end-to-end solution design, estimation, and delivery; mentor engineers across backend, cloud, and frontend.
- Reduced deployment time by ~20 minutes by optimizing Docker container images; cut deployment-related code ~50% via shared libraries.
- Led CI/CD and Infrastructure as Code for secure cloud deployments (Azure DevOps Pipelines, self-hosted agents, Blob Storage for artifacts).
- Built an evaluation pipeline to automate data ingestion, reducing manual work by ~30%.
- Hardened Azure networking and security with private endpoints, DNS zones, and firewalls; set up monitoring, logging, and debugging with Azure Functions and related Azure services.
- Projects: AskBall, Quote AI NAM.
- Clients: Emerson NAM, Ball Corp.

Lead Software Engineer- SLK Software / Digital (Part of Amin Holdings)

04/2024 – 05/2025

- Led and mentored engineers across backend, cloud, and frontend; owned end-to-end delivery across full SDLC.
- Improved scalability and reliability through architecture refinements and database migrations, cutting latency by ~20%.
- Built production platforms with Node.js, PostgreSQL, Docker, Kubernetes, GCP, and Azure; integrated Auth0/OKTA.
- Projects: Dextr, Quote AI MEA, Insure AI, FRP, MM-ERP, TAT, Mithril, POCs & demos.
- Clients: Emerson MEA, Berry Global, Maldivian Mermaid.

Senior Software Developer - Vijna Labs Pvt Ltd (Part of SLK Software)

08/2021 – 04/2024

- Delivered backend and cloud platforms for mission-critical systems with stronger reliability and scalability.
- Built Node.js/Express microservices and REST APIs with PostgreSQL for AI-driven data processing; created reusable components cutting dev effort ~80% and improving performance ~68% and enabled multi-tenancy and Row-Level Security (RLS).
- Integrated secure authentication with OKTA (SSO), Auth0, Azure AD, and JWT. Architected scalable GCP infrastructure (GKE, Pub/Sub) with end-to-end CI/CD (Concourse, Docker, Kubernetes).
- Enforced quality/security gates with Veracode, SonarQube, Stackdriver.
- Projects: NBSI, Endorsement, POCs & demos.
- Clients: CNA, Finolex.

Sr Software Developer - Immersion Software Labs Pvt Ltd

02/2017 – 08/2021

- Led End-to-end web delivery for AR/WebAR, VR/MR products and admin dashboards (UI/UX) across L Catalog, ALS, WebAR, POCs/demos.
- Built interactive AR experiences with A-Frame, Three.js, JSArToolkit, WebXR, and Babylon.js; optimized 3D rendering, interactivity, mobile performance.
- Optimized module loading and model re-rendering, reducing render time by ~30% and improving overall website performance by ~20%; enhanced AR model visualization by refining perspective camera angle, positioning, and lighting within the AR scene.
- Delivered AngularJS PWA and Google Analytics for engagement tracking and front-end flows for catalog browsing and AR campaigns.
- Built Node.js APIs with MongoDB (caching/proxy patterns) and deployed on AWS (EC2, S3, Auto Scaling, Security Groups, ELB, VPC).
- Projects: L Catalog, ALS, WebAR apps, POCs & demos.
- Clients: ALS, Cliff.

CERTIFICATIONS & ACHIEVEMENTS

Microsoft Certified: Azure Fundamentals (AZ-900) | Innovation Award (2024–2025) | Excellence in Performance Award (2021–2022)

EDUCATION

B.Tech / B.E., Computer Science and Engineering — VITAM (Affiliated: JNTU, Kakinada), 2015

LANGUAGES

English (Native), Telugu (Native), Hindi (Native), Kannada (Beginner)
